

Supine Stander

Standing changes how people see and experience the world. Our Supine Stander allows for greater social interaction and involvement in a wide range of therapeutic or recreational activities. With posterior and lateral support, the Supine Stander provides maximum stability while allowing partial weight-bearing and freedom of movement.

Why use a Supine Stander?

- **Standing option for medically involved clients:** The firm main board of the Supine Stander gives users with significant musculoskeletal weakness, secondary to prolonged immobilization, the opportunity to be positioned upright. Stability is provided posteriorly, making the Supine Stander a comfortable option for users with tracheotomy.
- **For gradual progression to an upright position:** The Supine Stander is effective for assisting individuals who have been bedridden for a long time to a standing position. The precise angle adjustment makes it ideal for people with orthostatic hypotension to lessen the adverse hemodynamic response from a rapid change in position.
- **Upright interaction:** Users can be at eye-level with their peers, participating in activities and initiating communication.
- **To improve head control:** The head support on the stander can be flipped down to allow the user opportunities to initiate and maintain head control.
- **Easier transfers:** The large Supine Stander's main board can be lowered to 21" off the ground when in the horizontal position, making transfers easier from a wheelchair or bed.

“Superbly adjustable and stable, the Supine Stander is ideal for the classroom. The vertical height adjustment makes transfers easier and provides versatility, adapting to the needs of many different students. And in the stander they’re more alert and active.”

Components

Tray

The tray has a smooth, cleanable surface with rounded corners. Adjust the armrests to change the angle of the tray.

Inside dimensions: 26" x 15"

Additional laterals

Add a pair of large or small additional laterals for extra support.

Sandals and wedges

Sandals and wedges raise heels or toes. Configure them with the unique "stack and latch" feature. For asymmetrical leg lengths, combine two wedges under one sandal.

Med: 4" x 9", **large:** 5" x 10½"

Adjustable abduction wedge

The adjustable abduction wedge can be changed from 3½" to 11" in width depending on how much abduction is desired.

Round abductor

The round abductor helps maintain 4" of comfortable knee separation.

Collar

The collar adds 2" of separation to the round abductor.

(Requires round abductor)

Hand Anchor

The hand Anchor attaches to the tray with a powerful suction cup. With a secure anchor point for one arm, the user can perform tasks more easily with the other arm and hand.

2024 order form

Use dimension chart to select appropriate size.

User dimensions (inches)	E430 large	
Height	46–72	
 <p>Key user dimension: height Select the appropriate stander by the user's overall height. Choose the model that allows for growth.</p> <p>Important: User's weight must not exceed the maximum working load.</p>		
	Item dimensions (inches)	E430 large
	Board length and width	73 x 19
Distance between laterals	9–16	
Height when horizontal	21–30	
Height when vertical	74	
Base length x width	46½ x 29½	
Max. working load (lb)	250
