

FOR THE ACTIVE WHEELCHAIR USER

Trochanter support

firmer density to provide lateral stability | redistributes pressure to help create an ischial well

Ischial well - Two compartments for superior pressure reduction in the IT-coccyx area & extra positioning possibilities

SmartCell – Foam barrier limits sliding forward

Ergonomically-shaped foam for easy transfers

- ▲ Perfect for users who transfer frequently
- ▲ Excellent lateral and frontal stability
- ▲ Features a nifty storage pouch for personal items

The Vicair Active 02 is a pre-contoured cushion which consists of 4 individual compartments filled with Smartcells at the back of the cushion and an anatomically contoured foam inlay at the front. Striking a unique balance between preserving skin at high risk areas at the ischials and coccyx by redistribution of pressures, stabilizing the pelvis and facilitating easy transfers. For specific needs the filling of each of the 4 SmartCell filled compartments can be easily adjusted. Allowing you to change the density of each compartment benefitting users who: (1) Need correction or accommodation of an assymetric pelvis. (2) Want (partial) off-loading of the ischial and coccyx area. (3) Benefit from additional lateral support.
